EDUCATION

PAMPANGA STATE UNIVERSITY Bacolor, Pampanga
BS in Computer Science 2022-2026

General Weighted Average (GWA): 1.33 / 1.00 (Magna Cum Laude); Dean's Lister, 2022–2026
Relevant Coursework: Human Computer Interaction, Graphics and Visual Computing, Web System and Technologies, Mobile Application Development

EXPERIENCE

MONTE CARLO TECHNOLOGIES San Pablo, Laguna
UX/UI Designer Intern May 2026 – Sept 2026

- Designed intuitive, responsive web interfaces for international client projects using Figma and Figma Motion, applying visual hierarchy, consistency, accessibility, and user-centered design to improve usability and user interactions.
- Contributed to the development of responsive, static front-end websites by following the company's standardized workspace structure and implementing the BEM (Block Element Modifier) methodology for maintainable, consistent CSS.
- Refined and redesigned existing web application mockups to improve the usability, visual hierarchy, and overall interface aesthetics, addressing client feedback and design requirements.

DAKILASOFT IT SOLUTIONS. Bacolor, Pampanga
Front-End Developer and UX/UI Designer Intern Feb 2026 – April 2026

- Translated existing website designs into a functional landing page using WordPress, ensuring visual consistency and alignment with the approved design specifications.
- Designed UX/UI enhancements for the PRC Board Exam Reviewer mobile application, optimizing user flows, navigation, and interface usability to deliver a more intuitive user experience.
- Collaborated with the design team to conceptualize, refine, and implement design improvements aligned with user needs and application goals.

PROJECTS

EXAMPLIFY: AI POWERED EXAM PLATFORM 2026

- Designed the platform's website interface in Figma, establishing a cohesive educational visual identity through relevant design assets and branding elements.
- Applied UX/UI principles, including visual hierarchy, consistency, and intuitive navigation, to create an engaging and user-friendly learning experience.

ARIA CARE: PATIENT COMMUNICATION TOOL 2026

- Redesigned and enhanced the existing website mockups in Figma, establishing a cohesive visual identity that communicates trust, clarity, and accessibility within a healthcare context.
- Incorporated animated UI components using Figma Motion to improve engagement and create a more dynamic user experience.

RIDE WITH ALLIANCE: ASSISTED MEDICAL TRANSPORTATION PLATFORM 2026

- Shaped the platform's website design in Figma, aligning its visual language and branding with its assisted medical transportation services.
- Optimized page layouts, content hierarchy, and navigation to make essential information easier to scan and transportation services easier to understand and for increased client satisfaction.
